# Honeywell Announces the CT60 XP with new features and capabilities

Honeywell is pleased to announce the addition of new SKUs with new features and capabilities added to the highly successful line of mobile computers. Based on Honeywell's Mobility Edge™ Android™ platform, the CT60 XP is a rugged, powerful computer designed for highly mobile, front-line workers, and managers in scan-intensive workflows. With a light weight, small form-factor, it provides an effective solution for capturing data resulting in better customer engagement, productivity, and operational insights.

We are adding new capabilities which extend the workflow, durability and performance of the mobile computer

- Mobility Edge FlexRange™ scan engine with longest range in a compact package
- Higher drop and tumble specification
- Added MiMo 2x2 antenna
- Brighter screen
- Improved ergonomics

## NEW PART NUMBERS

## ABOUT THE CT60 XP

Honeywell's CT60 XP mobile computer is designed for enterprises that require anywhere, anytime real-time connectivity to business-critical applications and fast data capture capabilities in a highly durable, long-lasting form factor built for maximum uptime and productivity out in the field or on the selling floor. Built on the Mobility Edge™ platform, the CT60 XP offers an integrated, repeatable, and scalable approach based on a common hardware and software platform unleashing customers from constraints faced today around integration and inflexible technologies without sacrificing enterprise security, reliability, performance or management features.

Juggling multiple devices across the enterprise introduces time- and cost-intensive complexities for Enterprise IT to manage and maintain. The CT60 XP, with Honeywell's Mobility Edge platform, enables customers to accelerate provisioning, certification, and deployment across the enterprise. The CT60 XP offers an extended product lifecycle across generations of Android™, through Android R, to maximize return on customer investment and provide a lower TCO. The CT60's advanced enterprise lifecycle tools greatly simplify frequently repeated tasks such as software updates, training of new employees, and managing spare pools.

The CT60 XP is packed with features to keep workers connected and productive all day long. The industry-leading advanced network connectivity facilitates large file transfers, video streaming, and quick remote access to business applications with enough battery power to last an entire shift. With the optional best in class imager, Mobility Edge FlexRange™, CT60 XP allows workers to achieve scanning ranges from few inches up to 33 ft (10 m). The rugged design withstands accidental drops and falls, yet is ergonomic and lightweight for comfortable, everyday use. A vivid 4.7" Corning® Gorilla® Glass 5 covered touchscreen display is easily read indoors and out, and can be used with finger, glove, or stylus.
